Mr. Steve M. Alexander  
Perimeter Areas Section Manager  
Nuclear Waste Program  
State of Washington  
Department of Ecology  
1315 W. 4th Avenue  
Kennewick, Washington 99336-6018

Dear Mr. Alexander:

TRANSMITTAL OF THE DESCRIPTION OF WORK FOR 100-D PONDS SAMPLING, PHASE II

This letter transmits Revision 01 of the subject document for your information. This version replaces Revision 00 which was previously submitted to the State of Washington Department of Ecology for review.

The Description of Work was updated to include more accurate information in the tables, particularly the sample container and holding time information. Also, there was the addition of the completed signature page and updated analyte list to the Data Quality Objectives Agreement document attached to the Description of Work.

If you have any questions, please contact Ms. N. A. Werdel on 376-5500.

Sincerely,

Julie K. Erickson, Director  
River Sites Restoration Division
